FOR IMMEDIATE RELEASE

Freight in the City – Safety first with Stoneridge’s advanced camera solutions

Dundee, Scotland — October 30, 2018 — Visit Stoneridge at Freight in the City 2018 at Alexandra Palace on 6 November, on stand S15 to see their unique camera systems, including the Stoneridge CornerEye® Camera. The system offers a 270° field of vision around your vehicle, covering the obligatory Classes V and VI and beyond. The combination of a wide-angle lens and real time imaging greatly increases visibility, making this innovative little camera the market leader in cab safety systems.

Other stand highlights include Stoneridge’s web-based tachograph analysis software, OPTAC3. This cost-effective and easy to use software enables fleet managers to ensure compliance for their fleets, through 40 different driver and vehicle reports and letters, which are available in 19 languages. Stoneridge will also be showcasing its practical and efficient range of download solutions, including the digiDL remote download tool.

Show visitors will also get a chance to see and demo Stoneridge’s new 1C Smart Tachograph. The European Commission is introducing the new Annex 1C legislation to reduce fraud through tachograph manipulation and improve the efficiency of the control of the system. Industry expert, Stoneridge, is ready for this change with the development of its new Smart Tachograph, to ensure drivers will be compliant, productive and working with the latest technology.

Freight in the City showcases the very latest vehicles, technology and equipment to enable urban deliveries to be made cleanly, safely, quietly and efficiently.

To learn more, visit Stoneridge on **stand S15** at Freight in the City 2018 or visit www.stoneridge-electronics.com.
