Automechanika 2014: The latest tachograph solutions from Stoneridge

Stoneridge will return to this year's Automechanika Frankfurt to show its smartest tachograph solutions yet. Visitors should not miss out on seeing the newest digital tachograph on the market, the SE5000 Exakt Duo², the future-driven Optimo workshop tool and much more.

Whether a workshop, fleet manager or driver Stoneridge asked its customers what they wanted to see in a new tachograph to help them in their daily work. Show visitors can now see it for themselves **at stand 3.0 G02**. In addition to the existing benefits such as the "One Minute Rule" and real-time updates and countdowns on drive and rest times, the new feature-driven **SE5000 Exakt Duo²** has a range of enhancements to the user interface. Fleets asked for Working Time Directive (WTD) calculations. This has been added and will help drivers to reduce infringements and costly fines. The SE5000 Exakt Duo² also comes with an improved Period of Availability (POA) setting, enabling drivers to choose how they allocate their time. Other features that have been added include: Ferry/train calculations in real-time; a display of the product version on the INFO menu; and the status of the Second source of motion on the technical printout.

Workshops can look forward to seeing the **Optimo**, the latest generation tachograph programming and calibration tool. Featuring wireless technology, it was designed to increase workshop efficiency through ease of use and many useful software applications.

Show visitors can also find out more about the **OPTAC3** tachograph analysis software, the **digiDL** remote download tool and the **Tacho Link** Bluetooth dongle which works in conjunction with two free **tachograph apps** - Duo Mobile and Tacho Center.

To learn more, visit Stoneridge on **stand 3.0 G02** at Automechanika Frankfurt 2014.

Note to Editors:

Stoneridge Electronics is a part of the Stoneridge Inc., a leading designer and manufacturer of highly engineered electrical and electronic components, modules and systems. Stoneridge has a strong reputation for developing innovative, reliable products including instrument clusters, tachographs, telematics systems and security systems for the automotive industry. The Stoneridge Inc. has an annual turnover of over \$947 million and just over 9,300 employees; of whom 1,140 work at Stoneridge Electronics.
